SELECTED PROJECTS

VeloceMart Global E-Commerce Analytics | Excel, SQL, Power BI, DAX | https://github.com/jipanchakma/VeloceMart-Global-E-Commerce

Built an end-to-end workflow: Excel data cleaning, SQL transformation and querying, and a four-page Power BI report with star-schema modelling, DAX measures, slicers, drill-downs and YoY analysis. Dashboard dataset reports $12.35M revenue, $5.47M profit and 55K orders.

Apex Solutions Three-Statement Financial Model | Excel | https://github.com/jipanchakma/apex-solutions-financial-model

Developed a learning-project forecast linking the Income Statement, Balance Sheet and Cash Flow Statement, using three years of historical information and five forecast years; included revenue, cost, depreciation, working-capital and debt projections with balance checks.

Hospital Emergency Room Dashboard | Excel | https://github.com/jipanchakma/hospital-er-dashboard-excel

Created an interactive dashboard to monitor 9,216 ER visits, average waiting time, satisfaction, admission status, patient demographics and department referrals, with year/month slicers, PivotTables, charts and sparklines.

Vindra Store Sales Dashboard | Excel | https://github.com/jipanchakma/vindra-store-sales-dashboard

Built an interactive retail sales dashboard using PivotTables, PivotCharts and slicers to analyse sales by month, category, channel, customer gender and age group, and geographic market.
